HELLO

Welcome to your **Perfect Practice** anal training kit. You are about to embark on an exciting exploration of one of your most erogenous zones. The walls of the anus contain nerve endings that can lead to delicious sensations when stimulated safely and effectively. So let's gently jump into how to best begin your booty journey.

As with any new physical sensation, the curiosity for the experience is usually what gets us on the path to experiment. With anal play, it's perfectly healthy and normal to feel both interest and trepidation.

SAFWORDS

Most people have heard the term, "safe word," but don't necessarily know what they are or how to integrate them. Basically, safe words are simple words or phrases you can use quickly and effectively to interrupt the momentum of any sexual experience or to stop it entirely.

Choose words that will take you both out of the scene. Using a color-coded system is great for first timers.

GREEN → GO
 YELLOW → SLOW
 RED → STOP

As you play more, you can consider using numbers between 1 and 10. Especially for ways to describe intensity. If the dominant is aiming for a robust spanking but the submissive is only feeling a 5, that can be helpful in getting both players to the level you both want to be at. Make sure you're in the right lane before hitting the accelerator.

PRACTICE

Our bodies and what feels good on any given day can change for a myriad of reasons. From hormones to mental stressors, to physiological factors. There's no shame if you ever feel the need to hold off, slow down or stop midway. The same "how to" steps will apply whether you are alone or with a partner, but we will discuss communication more at length after we cover the basics of your bum.

Your Perfect Practice anal training kit is specifically designed to ease into anal play.

BEGIN & WORK YOUR WAY UP

SLOW & STEADY

It's a good idea to try some solo exploration before inviting a partner into the mix, even if you hope to be giving anal pleasure more than receiving it. Knowing the anatomy and how things feel in your own body will better inform you on how to give and receive pleasure.

The best givers are the most informed. And we all know you want to give the best you can, you're sexy like that!

As you know now, anal play is all about relaxation. The anus produces no natural lubrication and is sensitive to micro-abrasions from friction. In preparation for the Lesson One plug make sure to use lubricant. We recommend water-based lubricants because silicone lube can bond to silicone products and cause your lovely little plug to erode. Using a clitoral vibrator or some passionate kissing while playing with your plug will often aid in total body relaxation.

DESIGNED BY SPORTSHEETS® IN CALIFORNIA SPORTSHEETS.COM

LET'S TALK

Conversations prior to play are important to gauge your partner's interest. While this booklet is a great tool, initiating verbal conversations can act as a form of foreplay and create intimacy.

Words of affirmation can aid in relaxation and arousal. Tell your partner how incredible they are. Even if it's not explicitly erotic, talk about the acts you're engaged in, it acts as encouragement and comfort to continue.

If you both enjoy more intense expressions of desire, anal is a fantastic time to get a little naughty. Our 3 sized anal plugs will keep you both on the edge of your seat!

REMEMBER

- 1 The difference between PAIN vs. PLEASURE
- 2 Use your SAFEWORD

AFTERCARE

Finally, once you and your partner finish, make sure you spend some time together for post-play affection also known as "aftercare." Aftercare is, in its simplest form, a post-sex wind-down ritual where partners show kindness and caring for each other. This helps ease the transition from sometimes intense play and immersive scenes back to reality.

Oftentimes, this can end up as a delightful reminder of the session and an exciting time to start thinking about doing it all again.

AFTERCARE IDEAS

- shower together
- ask how it felt for you both (go over what you liked about this time and what you might LOVE the next time)
- watch a movie
- eat snacks

HELLO

Welcome to **Love Me Gentle**, your sexy set of sensory delights. This booklet will provide tips to ensure that the maximum pleasure is derived from your kit. In this kit, you will begin to experiment with two types of BDSM play, impact and sensory. Both are unique additions to your sexual repertoire that can open you to a new world of delicious sensations.

The silky sash restraints and blindfold may feel soft, but depending on where your imagination wanders, they can be used to enhance exquisite torment. Your heart shaped paddle can be wielded as a reward as much as a punishment. While the dictionary may define BDSM as “bondage, dominance (or discipline), submission (or sadism) and masochism,” the experience of each individual is unique.

SAFESWORDS

Most people have heard the term, “safe word,” but don’t necessarily know what they are or how to integrate them. Basically, safe words are simple words or phrases you can use quickly and effectively to interrupt the momentum of any sexual experience or to stop it entirely.

Choose words that will take you both out of the scene. Using a color-coded system is great for first timers.

GREEN → GO
 YELLOW → SLOW
 RED → STOP

As you play more, you can consider using numbers between 1 and 10. Especially for ways to describe intensity. If the dominant is aiming for a robust spanking but the submissive is only feeling a 5, that can be helpful in getting both players to the level you both want to be at. Make sure you’re in the right lane before hitting the accelerator.

LET’S TALK

Allow your imagination to wander and be sure to receive partner consent before you begin.

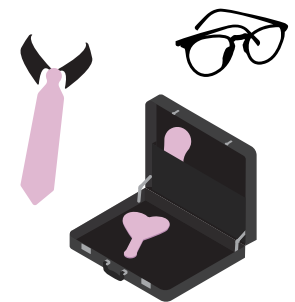

If you sometimes have difficulty shifting your thoughts from daily stresses to sexual fantasies- a little physical stimulation can help you get into the right headspace. Taking a bath, listening to music or enjoying a massage are just some of the ways you can relax your body.

This preparation can start moments, hours, or even days before you engage in what the BDSM community commonly refers to as a “scene.” Consider making this more about exploration rather than climax. For example, one of you may be bound and blindfolded as the other uses toys or performs oral sex, but then switches to kissing or spanking before allowing the other to orgasm.

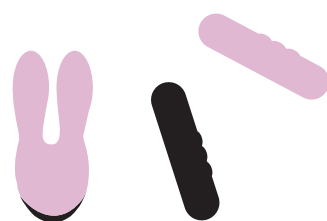

SET THE SCENE

In initiating conversations about sexual fantasies and BDSM, you can begin with discussing what you like or are curious about before getting into specific questions with your partner. You may mention something they’ve done in the past that helped to inspire your desire. The way they performed a sexy act, something they said one day or the way they moaned that one time could be a playful catalyst into your interest in exploring some more intention dominant/submissive dynamics.

Examples of BDSM fantasies may include role playing by dressing up, pretending to be characters (which can be as simple as choosing a taboo dynamic like professor/dean).

DESIGNED BY SPORTSHEETS® IN CALIFORNIA | SPORTSHEETS.COM

You may also enhance your scenes with toys such as vibrators or add accoutrements like candles and massage oil. Surrendering can be all about relaxing into a moment and allowing a heightened level of pleasure. Of course, it can also include vigorous sex, some spanking and dirty talk. This wide range of possibilities is why communication in advance is so important.

Talk as much about what you don’t want as what you do. If you are unsure about things that you think you want to try refer to those things as soft limits. For example, you might decide having hands tied for some experiences but during others it may feel cumbersome.

AFTERCARE

Finally, once you and your partner finish, make sure you spend some time together for post-play affection also known as “aftercare.” Aftercare is, in its simplest form, a post-sex wind-down ritual where partners show kindness and caring for each other. This helps ease the transition from sometimes intense play and immersive scenes back to reality.

HELLO

Welcome to your naughty set of kinky delights. We are thrilled to initiate you into the world of BDSM and sensory play. Wherever you may be in your experience and interest, we'd like to share a few secrets so you derive the most pleasure from your *Learn the Ropes* kit.

Your kit includes a blindfold, finger flogger, rope and scissor. Before your imagination runs wild, we will go over a few preparations and best practices to ensure safety. While the textbook definition of BDSM is "bondage, dominance (or discipline), submission (or sadism) and masochism," the practice of BDSM is much more nuanced. It is often the rules and restraints that make it so erotic. Boundaries can lead to new levels of communication while safety and consent allow for newfound freedoms and ecstasy.

SAFESWORDS

Most people have heard the term, "safe word," but don't necessarily know what they are or how to integrate them. Basically, safe words are simple words or phrases you can use to quickly interrupt the momentum of any sexual experience or stop it entirely.

Choose words that will take you both out of the scene. Using a color-coded system is great for first timers.

GREEN → GO
 YELLOW → SLOW
 RED → STOP

As you play more, you can consider using numbers between 1 and 10. Especially for ways to describe intensity. If the dominant is aiming for a robust spanking but the submissive is only feeling a 5, that can be helpful in getting both players to the level you both want to be at. Make sure you're in the right lane before hitting the accelerator.

LET'S TALK

Allow your imagination to wander before you get started and be sure to receive their consent in advance of negotiations. Be sure to talk as much about what you don't want as what you do. By fine tuning contexts, your fantasies become safer to try in reality.

Examples of BDSM fantasies may include role playing by dressing up, pretending to be characters which can be as simple as choosing a taboo dynamic like professor/dean. It's also fun to completely be yourselves while agreeing to an imaginary scenario where use of force and/or surrender are imperative. Some fantasies can be built around a new location or an imagined one.

Fantasies can also be pragmatic, like putting the finger flogger in your purse or pocket for quick swats in a hotel room on your lunch break.

SET THE SCENE

In initiating conversations about sexual fantasies and BDSM, you can begin with discussing what you like or are curious about trying. You may mention something they did in the past that helped to inspire your desire, you enjoyed the way a pillow fell over your eyes and would like to try being blindfolded before play.

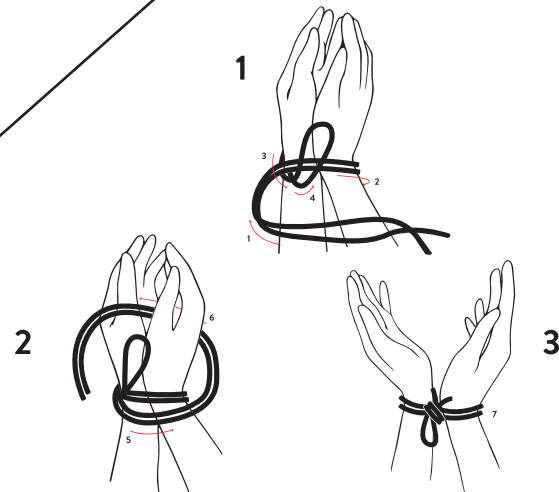

Remember, especially when trying a new thing, orgasms do not need to be the primary goal. In fact, it can be very liberating to focus on exploration over climax. For example, one of you may be bound by rope and blindfolded as the other performs oral sex, but then switches to kissing before allowing the other to orgasm.

You can enhance your scenes with toys such as vibrators or accoutrements like candles and massage oil.
